Flexport moves freight globally by air, ocean, rail, and truck for the world's leading brands. Only Flexport delivers deep visibility and control, low and predictable supply chain costs, and faster and more reliable transit times.

### Flexport: Technology Platform for Global Logistics

Scheme is a minimalist dialect of the Lisp family of programming languages. Scheme consists of a small standard core with several tools for language extension. Scheme was created during the 1970s at the MIT AI Lab and released by its developers, Guy L. Steele and Gerald Jay Sussman, via a series of memos now known as the Lambda Papers. It was the first dialect of Lisp to choose lexical scope and ...

What are the 4 types of AI? In his explanatory article on four main types of artificial intelligence, author David Petersson outlined how modern artificial intelligence evolved from AI systems capable of simple classification and pattern recognition tasks to systems capable of using historical data to make predictions. Propelled by a revolution in deep learning -- i.e., AI that learns from data ...

In informatica la programmazione funzionale è un paradigma di programmazione in cui il flusso di esecuzione del programma assume la forma di una serie di valutazioni di funzioni matematiche. Il punto di forza principale di questo paradigma è la mancanza di effetti collaterali (side-effect) delle funzioni, il che comporta una più facile verifica della correttezza e della mancanza di bug del ...
