A Soxhlet extractor is a piece of laboratory apparatus invented in 1879 by Franz von Soxhlet. It was originally designed for the extraction of a lipid from a solid material. Typically, Soxhlet extraction is used when the desired compound has a limited solubility in a solvent, and the impurity is insoluble in that solvent. It allows for unmonitored and unmanaged operation while efficiently ...

Soxhlet extractor - Wikipedia

Create Second-Semester Courses . Coordinators should create a second-semester section for any course that begins after the November 15 final ordering deadline or is held only during the second semester.
