Gulls : a guide to identification (Book, 1997) [WorldCat.org]

A delicate seabird that nests by the thousands in North American marshes, the Franklin's Gull spends winters along the coasts of Chile and Peru. Its buoyant, swift, graceful flight is useful for catching both flying insects and small fish, as well as for making its long migrations. Breeding adults have black heads and pink-tinged underparts, leading to their folk name of "rosy dove."

Franklin's Gull Life History, All About Birds, Cornell Lab ...

Possibly the easiest-to-identify gull in North America, Heermann's Gulls in breeding plumage are mostly deep storm-cloud gray with a pearly white head and a brilliant red bill. Immatures are also distinctive, with dark sooty brown plumage and little streaking or mottling. These medium-sized gulls breed in Mexico's Gulf of California and then migrate northward to spend late summer and fall ...

Heermann's Gull Life History, All About Birds, Cornell Lab ...

The Glaucous-winged Gull is a large, pale gull of Pacific shorelines. It's relatively easy to pick out from other gulls—most species have black wingtips, but adult Glaucous-winged Gulls have pearly gray wingtips that match the color of the rest of the back and upperwing. The only catch is that they often hybridize with Western, Glaucous, and Herring Gulls, complicating identification.

Glaucous-winged Gull Life History, All About Birds ...

Familiar acrobats of the air, Ring-billed Gulls nimbly pluck tossed tidbits from on high. Comfortable around humans, they frequent parking lots, garbage dumps, beaches, and fields, sometimes by the hundreds. These are the gulls you're most likely to see far away from coastal areas—in fact, most Ring-billed Gulls nest in the interior of the continent, near freshwater. A black band encircling ...
